Load Assist Kits

Thor Air Bellows are tested to ADR standards. Thor Air Bellows are rated to 2.2 tonnes which is well in excess of that required by manufacturers /authorities. They do not however increase your GVM. So please adhere to vehicle manufacturers specifications.

- Air adjustable 0~150psi
- Heavy Duty construction
- A must for constantly loaded 4WD and Utes
- Easy to fit and easy to use
- Rated to carry 1.2 tonne (1200 kg) per bellow
- They fit between the axle and the chassis and are easy to fit
- Will decrease tyre wear

Detailed Product Information

Australian Made Heavy Duty Engineered Brackets

- These brackets are Laser Cut, from 5mm Australian Steel, not stamped, each bracket is Mig welded and are either zinc plated in a silver finish to ensure long lasting rust protection or black powder coating for superior durability.
- Our brackets have been tested by a Government Accredited Certifier to 51kn, that's just over 5.11 tonne!
- Our brackets don't bend or break like other brands.

Quality Australian Made Airlines and fittings

- Our airline is made in Australia and fittings supplied from Australian Owned Companies to help keep the dollar in Australia and support local business

Superior Quality Double Convolute Rubber Bellows

- These are imported / not made in Australia, (as we don't have the technology available here).

These double convoluted bellows feature heavy duty 5mm thick corded/ribbed rubber similar to the sidewall of a car or 4WD tyre, which have a travel rate of 5.5 inches.

- This gives a better ride than sleeve bags by having more flex and travel.
- Our bellows have been tested by an accredited Government Certifier, and have been tested to 464psi without bursting.

These kits are ideal for leaf spring applications on:

- Motorhomes
- 5th wheelers
- Farm trucks
- Trailers
- Farm machinery

It is ideal when towing:
